The International Conference of Mathematics and Computer Science

The International conference of Physical sciences is being held in Jyoti Nivas College Autonomous on 16 – 17, February 2017, in collaboration with International Multidisciplinary Research Foundation (IMRF). The attempt to fuse the various disciplines of physical sciences in a single forum is an effort to communicate the message of ‘Science for Humanity’. Every discipline offers multiple avenues for research and development to one another. We acknowledge the inter connectedness of these subjects and wish to carry forward the collaborative research for a better society. The conference aims to provide an environment for the exchange and dissemination of new avenues and technologies in Mathematics, Computer Science, Electronics, Physics and Chemistry. The conference is sure to transform the knowledge of the delegates with a wide range of invited lectures and paper presentations.

The presentations during the conference vary from Pure Mathematics & Applied Mathematics, Application Oriented Mathematics, Pure & Applied Statistics, Computer Science, Information Technology, automation, robotics, electrical engineering, nano- electronics, renewable energy in electronics, quantum physics, natural products, plasma physics, Astro physics, chemical and biochemical engineering, medicinal and pharmaceutical chemistry, green and environmental chemistry and much more.
