NETinfinity:

Changing PERSPECTIVES. reconstructing NARRATIVES

The possibilities inherent in the internet may be infinite. We have the world at our fingertips. We post, tweet and click every aspect of our lives for the world to see, like and comment upon. News, views and what-not is up and running on the web in an instant.

The internet is the new realm where ideologies are propagated; new realities are created in this powerful alternative space, which also, dictate the happenings in the real world. This in turn, leads to reconstruction of newer narratives that pave the way for an alternate social order. Whether online surveillance and freedom of speech, fake news epidemic, issues with dissemination of information and net neutrality, the online space comes with its own set of advantages and challenges.

Mediatron 2017, NETinfinity: changing Perspectives. reconstructing Narratives engaged in intellectual conversations and allied activities on the unlimited potential and the challenges of the internet era.
