

Documentation of World Environment Day Programme

Date: 5th June

Time: 10:30 a.m. to 1:00 p.m.

Organised by: IQAC, Department of Biological Sciences, and Rangers Unit

Venue: College Campus and Koramangala Slum Area

Objective: To promote and create environmental awareness and social responsibility.

Report: On the occasion of World Environment Day, the Rangers Unit, in collaboration with IQAC and the Department of Biological Sciences, organised various activities to promote environmental awareness and social responsibility.

The programme commenced at 10:30 a.m. with a tree plantation drive in the college campus. A sapling was planted by our Principal Dr. Sr. Louisa S and the Rangers Unit Leader, symbolising the importance of protecting and preserving nature for future generations.

The Rangers then displayed and marched an awareness rally with posters carrying messages on environmental conservation, cleanliness, and sustainable living. The posters highlighted the need to reduce pollution, conserve natural resources, and protect biodiversity.

As a part of community outreach, the Rangers visited a nearby slum area, where they donated clothes to the residents and conducted an awareness campaign on safeguarding the environment. The team encouraged the community to maintain cleanliness, plant more trees, reduce waste, and adopt eco-friendly practices.

Outcome:

The programme concluded at 1:00 p.m. and was a meaningful initiative that strengthened environmental consciousness and inspired everyone to contribute towards building a clean, green, and sustainable future. The activities reflected the Rangers' spirit of "Service" and their commitment to society and the environment.
